ON PATENTABILITY**

International application No.
PCT/GB 03/05175

Box: No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:
- ☒ the entire international application,
 - ☐ claims Nos.
because:
 - ☐ the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):
 - ☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):
 - ☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.
 - ☐ no international search report has been established for the said claims Nos.
 - ☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
 - the written form ☐ has not been furnished
 - ☐ does not comply with the standard
 - the computer readable form ☐ has not been furnished
 - ☐ does not comply with the standard
 - ☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.
 - ☐ See separate sheet for further details

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The subject-matter of claim 1 of the present application discloses a method for performing genetical computations. However, the steps to perform the method disclosed by claim 1 (parameterizing a design space, encoding a parent population into a population of functional elements, grouping functional elements, creating an offspring population, reporting results, ranking complexity) are regarded as pure mental acts not possessing any technical features or producing any technical effect as required by the PCT. Moreover, no such **technical** features or effects could be identified in the description of the present application. Claim 1 is therefore considered to be of an abstract character (see also the PCT Guidelines Part III, 9.05, 9.07 and 9.01-9.04). The same applies to dependent claims 2-16. With regard to claims 17 and 18, although a feature that is technical per se (a computer, a computer program product) is disclosed in said claims, it is considered irrelevant for the purposes of Rule 67 PCT, as the same effect could be achieved by using, for example, a piece of paper and a pencil.
2. Consequently, claims 1-18 of the present application relate to subject-matter considered by this Authority to be covered by provisions of Rule 67.1(i) PCT. Therefore, according to Article 34(4)(a)(i) PCT, this Authority has decided not to carry out an International Preliminary Examination of the present application in the sense of Article 33(1) PCT.
